

Straits Payroll - Test Environment Setup Guide

1. Prerequisites

Make sure you have installed the following requirements on your computer:

- **Flutter SDK:** Version 3.19.x or later.
- **Java Development Kit (JDK):** JDK 17 for Android builds.
- **Android Studio:** Installs Android SDK, tools, and Android Virtual Device (AVD) emulator.
- **Xcode:** (macOS only) Installs iOS Simulator and build tools.

2. Initialize Workspace

Open your terminal and navigate to the application folder, then retrieve all package dependencies:

```
flutter pub get
```

3. Running the Web Admin Dashboard

The web application is used by platform super admins and company admins. To launch the web admin dashboard locally:

```
flutter run -d chrome
```

4. Running the Mobile Application

The mobile application is used by employees and supervisors.

For Android: Start an Android emulator or connect a physical Android device, then run:

```
flutter run -d android
```

For iOS: Start an iOS Simulator or connect an iPhone, then run:

```
flutter run -d ios
```
